

Together we are stronger!

hameln-rds and Transo-Pharm start cooperation

We would like to announce that hameln rds s.r.o., Slovakia, and Transo-Pharm Handels-GmbH, Germany, have decided to join hands with the aim to adequately supply high quality **Norepinephrine bitartrate** to the market.

Transo-Pharm has a very long history in distribution & marketing of Epinephrine Base & Bitartrate, originating from the previous market leader Boehringer Ingelheim. In addition, Transo-Pharm has experience in the technical characteristics and regulatory affairs related aspects of these API's resulting in various CEP's and DMF's where Transo-Pharm is the holder of the documentation.

hameln rds has decades of experience and expertise in developing and manufacturing synthetically made APIs for the pharmaceutical industry. Their GMP/quality compliance systems and their capability to adapt to changes in manufacturing techniques and regulatory environment has enabled hameln rds to supply consistently high-quality APIs to the US & EU territories. The audit reports by the USFDA, EDQM and other authorities as well as customers are very encouraging.

We have set up the partnership structure in a way that enables hameln rds to focus on production & quality excellence while Transo-Pharm's focus will be on the commercial side, supply chain and warehousing of the API (GMP-compliant storage and GDP-compliant shipping).

We strongly believe that this is the best model to serve our worldwide customers in an optimal and efficient manner.

We therefore kindly ask you to approach Transo-Pharm for any kind of commercial, supply chain or regulatory related questions/support.

Please contact Stefan Bertram, Product Manager for

-Epinephrine Base

-Epinephrine Bitartrate &

-Norepinephrine Bitartrate, under bertram@transopharm.de or Tel. no. +49 4107 8778 123.
