

Timolol Maleate

Synonym	(S)-Timolol hydrogen maleate / (S)-3-[3-(tert-butylamino)-2-hydroxypropoxy]-4-morpholino-1,2,5-thiadiazole monomaleate				
CAS. No.	26921-17-5				
Quality	EP / USP				
CMO / Manufacturer	Tbd				
Pharmacological Group	beta-adrenergic				
Application	eye drops, tablet				
Manufacturing / Extraction	<i>Synthetic</i> <input checked="" type="checkbox"/>	<i>Semi-Synthetic</i> -	<i>Fermentation</i> -	<i>Extractive</i> -	
Project status	<i>Lab</i> -	<i>Up-Scale</i> -	<i>Validation</i> -	<i>Commercial</i> <input checked="" type="checkbox"/>	
Regulatory documentation	<i>CEP</i> <input checked="" type="checkbox"/>	<i>EU-AP (Open Part)</i> -	<i>US-TDP</i> <input checked="" type="checkbox"/>	<i>J-DMF</i> -	<i>Other</i> -
Technical product specification	<i>Samples</i> <input checked="" type="checkbox"/>	<i>Batch size</i> 	<i>Retest Period</i> 5 years	<i>Stability Data</i> <input checked="" type="checkbox"/>	<i>Packaging</i> 100 g / 1000 g
	<i>Lead Time</i> 2 weeks		<i>Shipping & Storage Conditions</i> no special		<i>Other</i> -
GMP status / Audit	<ul style="list-style-type: none"> • EU GMP & Local GMP 				
Other information	<ul style="list-style-type: none"> • antihypertensive, antiarrhythmic antiangina and antiglaucoma agent • ophthalmic use (glaucoma, intraocular hypertension) • oral use (increases blood pressure, prevention of complications after heart attack)
